

Guide to Discussing the Medical Ketogenic Diet with Your Neurologist

The medical ketogenic diet for intractable epilepsy is intended for use under medical supervision. This guide was created to support your conversation about the medical ketogenic diet with your neurologist to see if the medical ketogenic diet is right for you. Prior to your appointment, we recommend completing the questionnaire below and discussing your responses with your provider.

Facts About the Medical Ketogenic Diet for Epilepsy:

- Experts recommend that the medical ketogenic diet be considered after failure of 2-3 properly chosen Antiepileptic Drugs (AEDs).
- The medical ketogenic diet is not just for children. Studies have shown the medical ketogenic diet to be helpful in managing intractable epilepsy for both children and adults.
